AFTER

GEOPLAST PLASTIC FORMWORK

LET'S PROMOTE INNOVATION AND USE THIS NEW TOOL!

NCC - CRI and NCC - CRA projects have launched the use of plastic formworks to avoid using traditional wooden formworks.

BENEFITS OF USING GEOPLAST PANELS:

SAFETY

- No need for nails, the risk of crushing finger by hammer is thus eliminated.
- No need for small pieces of wood, the risk of cut with a circular saw is eliminated.

HEALTH

- Manual handling limited to light elements.

QUALITY

- Better concrete shapes, quality of work is improved.

ENVIRONMENT

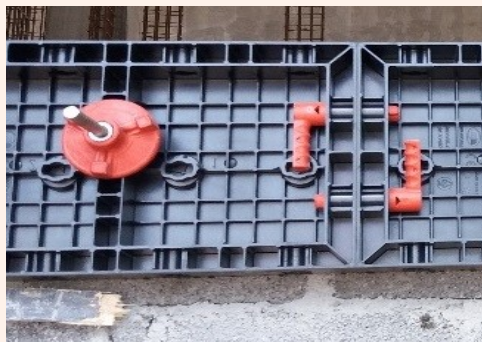

- Geoplast panels can be reused many times. Waste are reduced.

ECONOMIC

- Initial investment enables to save the cost of expensive plywood previously used.

BYTK =>

Already 2 Lost Time Accidents level involving hammer and wooden formwork,
1 LTA involving circular saw.

Panels can be purchased on PABLO from GEOPLAST.
